

Welcome to GmailTips.com!

Wow! Somethingâ??s new! Yep, after a few years, I decided to migrate from Joomla to WordPress as my back-end site software. I find it to be better for my needs, so I hope that it will let me provide more timely and more frequent content. Second, I have included an RSS feed from the Official Gmail Blog. As news of new and exciting Gmail features come out, they will be posted here. Finally, GmailTips.com has always been part of JimsTips.com, so I decided to forgo the Gmail-looking theme and just use the same template as JimsTips.com throughout all of my Tips sites. Thanks for visiting!!
